

Data Sheet

1m Eaves Comb Filler

Provides a bird, vermin & large insect barrier below profiled roof tiles

Application

- Fit directly below profiled roof tiles at eaves level
- Offers protection against bird, vermin & large insects from entering the void between membrane/felt and roof tiles

Product Features & Benefits

- Supplied in convenient 1m lengths
- Clear fixing points to fix direct to top of fascia board at 100mm centres
- Integral flyscreen at 4mm
- Lightweight and resistant to corrosion and rotting

Materials

- Manufactured in Black recycled Polypropylene

Installation Guide

- Nail to the top of the fascia board through the fixing holes provided
- Install along the full length of the eaves
- But joint and cut to length as required
- Prongs fold down with the weight of profiled tile
