

## Data Sheet

### 4 All Drainage Channel B125 Ductile Grating

#### Features

- Click the grating in and out, no screws required
- Designed in accordance with EN 1433
- Easy to assemble
- Quick waterflow drainage
- External ribs provide improved anchoring between Concrete and HDPE and provides better strength and rigidity
- High mechanical and chemical resistance
- Lightweight
- Easy to carry

#### Channel Dimensions

Length (mm)	1000
External width (mm)	120
External High (mm)	90
Internal Width (mm)	95
Internal High (mm)	80
Outlets	110 with outlet converter
Drainage section (cm <sup>2</sup> )	69.28
Capacity (dm <sup>3</sup> =litres)	6.92

#### Installation

For the installation of the 4ALL channel with B125 class grating, the trench should be 192 mm high ( 92 mm for the channel height + 100mm for the concrete laying bed) and 320mm wide (120 mm for the channel width + 200mm for the side flankings).
