

Data Sheet

HI-TAC Self Adhesive Scrim

Description

Hi-Tac self-adhesive fibre glass tape is a multi purpose mesh tape for use in plasterboard jointing and repairs. It is designed to reinforce the joint and is suitable for all types of plasterboard. Being self-adhesive the product saves considerable time during installation when compared to traditional scrim. Hi-Tac has a much greater glue content than traditional self-adhesive fibreglass tapes and so are more suitable for use in cold temperatures.

| Description | Size | Unit |
|--------------------------------------|--------------|------|
| HI-TAC Self adhesive fibreglass tape | 50mm x 90m | roll |
| HI-TAC Self adhesive fibreglass tape | 75mm x 90m | roll |
| HI-TAC Self adhesive fibreglass tape | 100mm x 45m | roll |
| HI-TAC Self adhesive fibreglass tape | 1000mm x 30m | roll |

Technical Data

| | |
|--------------------|------------------------------------|
| Product name | Self Adhesive fibreglass tapes: |
| Specifications | 2.85 x 2.85mm (9 x 9 count/25cm) |
| Warp of yarn | 33 tex x2 |
| woof of yarn | 100tex |
| Mesh size | 9 x 9 mesh |
| Average of weight: | ≥70g/m ² |
| Tensile strength | Warp: 500N/50mm Weft: 800N/50mm |

Alkaline resistant Acrylic and adhesive acrylic total content: 30%

Alkaline resistant resin: Acrylic resin.

Adhesive coating: Acrylic resin. It will keep strong sticky within 6 months.
